Record Hours of Service with the TMT ELD

STEP 1:

Driving mode

When your vehicle is moving at 5 MPH or greater, TMT ELD considers the vehicle to be IN MOTION and your duty status will automatically be set to Driving.

STEP 2:

At 0 MPH, the vehicle is considered STATIONARY.

*

STATIONARY

10:59

STEP 3:

When STATIONARY, you can change your duty status by tapping DRIVING and selecting one of the alternate duty statuses listed.

If the vehicle remains STATIONARY for five minutes, a pop-up window will appear that asks if you still driving or not. If nothing is selected, your duty status will automatically be changed to On Duty.

DOT Inspection mode

STEP 1:

Tap on the DOT icon from the menu.

* Disconnected

STEP 3:

Contact the customer support team and explain the situation and they will test your device and tell you if it is functioning correctly or malfunctioning.

Email: support@tmteld.com

Phone: 818-479-1600

Web: www.tmteld.com

STEP 2:

Try to turn off your bluetooth, wait 30 seconds and turn it back on. After you turn it on go back to the TMT ELD app and try to reconnect.

ELD Malfunction

§ 395.22 Motor carrier responsibilities—In general. (h) In-vehicle information. A motor carrier must ensure that its drivers possess onboard a commercial motor vehicle an ELD information packet containing the following items: 3. An instruction sheet for the driver describing ELD malfunction reporting requirements and record keeping procedures during ELD malfunctions. The following instructions are in accordance with the guidelines set forth in § 395.34:

How does the driver know if the ELD is malfunctioning?

Neither of the LED lights on the device are turned on (neither green nor red) when the device is plugged into the truck's diagnostic port and power is flowing to it.
